

A Text Book on  
**NOVEL DRUG  
DELIVERY  
SYSTEMS**

**Dr. B. Nagamani  
Ms. A. Suneetha Devi  
Mrs. M. Bhagyasree**

# **A Text Book on Novel Drug Delivery Systems**

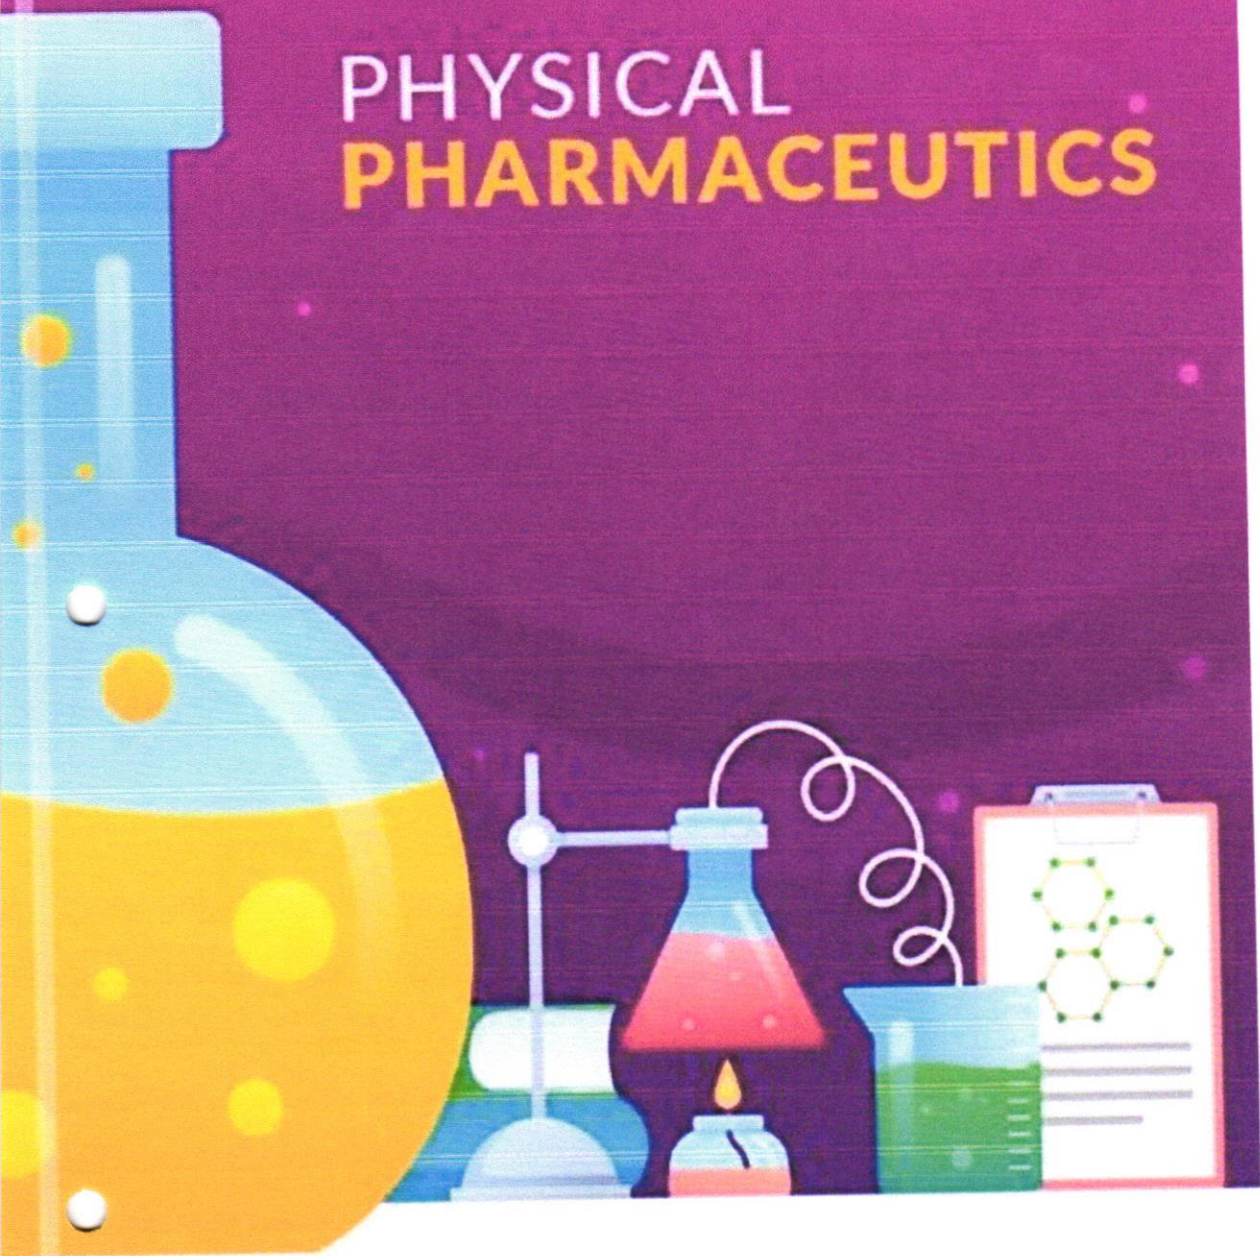

**Dr.B.Nagamani, Ms.A.Suneetha Devi, Mrs.M.Bhagyasree**

**Year 2021**

# Contents

|  |            |
|--|------------|
| Preface .....  | v          |
| <b>1 Drug Delivery Systems – An Overview .....</b>   | <b>1</b>   |
| Kewal K. Jain  |            |
| <b>2 The Role of the Adeno-Associated Virus</b>  |            |
| <b>Capsid in Gene Transfer .....</b>   | <b>51</b>  |
| Kim M. Van Vliet, Veronique Blouin, Nicole Brument,<br>Mavis Agbandje-McKenna, and Richard O. Snyder |            |
| <b>3 Delivering Small Interfering RNA for Novel Therapeutics .....</b>                               | <b>93</b>  |
| Patrick Y. Lu and Martin C. Woodle   |            |
| <b>4 Catheters for Chronic Administration of Drugs</b>   |            |
| <b>into Brain Tissue.....</b>  | <b>109</b> |
| Michael Guarnieri, Benjamin S. Carson, Sr., and George I. Jallo                                      |            |
| <b>5 Transdermal Drug Delivery Systems:</b>  |            |
| <b>Skin Perturbation Devices.....</b>  | <b>119</b> |
| Marc B. Brown, Matthew J. Traynor, Gary P. Martin,<br>and Franklin K. Akomeah                        |            |
| <b>6 Controlling the Release of Proteins/Peptides</b>  |            |
| <b>via the Pulmonary Route .....</b>   | <b>141</b> |
| Sunday A. Shoyele  |            |
| <b>7 Engineering Protein Particles for Pulmonary Drug Delivery.....</b>                              | <b>149</b> |
| Sunday A. Shoyele  |            |
| Contents   |            |
| <b>8 2B-Trans™ Technology: Targeted Drug Delivery</b>  |            |
| <b>Across the Blood–Brain Barrier.....</b>   | <b>161</b> |
| Pieter J. Gaillard and Albertus G. de Boer   |            |
| <b>9 Drug Delivery in Cancer Using Liposomes .....</b>   | <b>177</b> |
| Crispin R. Dass  |            |
| <b>10 pH-Responsive Nanoparticles for Cancer Drug Delivery .....</b>                                 | <b>183</b> |
| Youqing Shen, Huadong Tang, Maciej Radosz, Edward Van Kirk,<br>and William J. Murdoch                |            |
| <b>11 Extended-Release Oral Drug Delivery Technologies:</b>  |            |
| <b>Monolithic Matrix Systems .....</b>   | <b>217</b> |
| Sandip B. Tiwari and Ali R. Rajabi-Siahboomi   |            |
| <b>Index.....</b>  | <b>245</b> |

# PHYSICAL PHARMACEUTICS

Ms.D.Aswani, Ms.D.Pavitra, Mr.K.Srinu

|  |                   |
|--|-------------------|
| <b>1. Solubility of Drugs</b>  | <b>1.1 - 1.32</b> |
| 1.1 Introduction   | 1.1               |
| 1.2 Solubility Expressions   | 1.2               |
| 1.3 Mechanisms of Solute Solvent Interactions  | 1.5               |
| 1.4 Ideal Solubility Parameters  | 1.6               |
| 1.5 Solvation  | 1.7               |
| 1.6 Association  | 1.8               |
| 1.7 Quantitative Approach to the Factors Influencing Solubility of Drugs                   | 1.9               |
| 1.8 Diffusion Principles in Biological Systems   | 1.11              |
| 1.9 Solubility of Gas in Liquids   | 1.12              |
| 1.10 Solubility of Liquids in Liquids  | 1.14              |
| 1.10.1 Binary Solutions  | 1.14              |
| 1.10.2 Ideal Solutions   | 1.15              |
| 1.11 Raoult's Law  | 1.17              |
| 1.12 Real Solutions  | 1.21              |
| 1.13 Partially Miscible Liquids  | 1.21              |
| 1.14 Critical Solution temperature and its Applications                                    | 1.22              |
| 1.15 Distribution Law  | 1.26              |
| 1.15.1 Limitations of Distribution Law   | 1.29              |
| 1.15.2 Applications of Distribution Law  | 1.29              |
| • Exercise   | 1.30              |
| <b>2. States and Properties of Matter and Physicochemical Properties of Drug Molecules</b> | <b>2.1 - 2.78</b> |
| 2.1 States of Matter and Properties of Matter  | 2.1               |
| 2.1.1 States of Matter   | 2.1               |
| 2.1.2 Changes in the State of Matter   | 2.5               |
| 2.1.3 Latent Heat  | 2.6               |
| 2.1.4 Vapour Pressure  | 2.7               |
| 2.1.5 Sublimation  | 2.11              |
| 2.1.6 Critical Point   | 2.12              |
| 2.1.7 Eutectic Mixtures  | 2.13              |
| 2.1.8 Gases  | 2.14              |
| 2.1.9 Aerosols   | 2.22              |

|   |                   |
|---|-------------------|
| 2.1.10 Inhalers   | 2.22              |
| 2.1.11 Relative Humidity  | 2.24              |
| 2.1.12 Liquid Complexes   | 2.29              |
| 2.1.13 Liquid Crystals  | 2.30              |
| 2.1.14 Glassy State   | 2.35              |
| 2.1.15 Solids   | 2.38              |
| 2.2 Physicochemical Properties of Drug Molecules: Determinations and Applications | 2.60              |
| 2.2.1 Refractive Index  | 2.62              |
| 2.2.2 Optical Rotation  | 2.66              |
| 2.2.3 Dielectric Constant   | 2.71              |
| 2.2.4 Dipole Moment   | 2.73              |
| 2.2.5 Dissociation Constant   | 2.75              |
| • Exercise  | 2.76              |
| <b>3. Surface and Interfacial Phenomenon</b>                                      | <b>3.1 - 3.44</b> |
| 3.1 Liquid Interface  | 3.2               |
| 3.2 Surface Tension   | 3.3               |
| 3.3 Interfacial Tension   | 3.4               |
| 3.4 Surface Free Energy   | 3.5               |
| 3.5 Classification of Methods   | 3.7               |
| 3.6 Measurement of Surface Tension  | 3.9               |
| 3.7 Measurement of Interfacial Tension  | 3.18              |
| 3.8 Spreading Coefficient   | 3.20              |
| 3.9 Adsorption at Liquid Interfaces   | 3.23              |
| 3.10 Surface Active Agents  | 3.24              |
| 3.11 HLB Scale  | 3.25              |
| 3.12 Solubilization   | 3.30              |
| 3.13 Detergency   | 3.36              |
| 3.14 Adsorption at Solid Interface  | 3.37              |
| • Exercise  | 3.43              |
| <b>4. Complexation and Protein Bonding</b>  | <b>4.1 - 4.30</b> |
| 4.1 Introduction  | 4.2               |
| 4.2 Classification of Complexation  | 4.2               |
| 4.3 Applications of Complexation  | 4.14              |
| 4.4 Methods of Analysis   | 4.16              |
| 4.5 Protein Binding   | 4.24              |

|     |  |      |
|-----|--|------|
| 4.6 | Complexation and Drug Action                   | 4.26 |
| 4.7 | Crystalline Structures of Complexes            | 4.27 |
| 4.8 | Thermodynamic Treatment of Stability Constants | 4.28 |
| •   | Exercise                                       | 4.29 |

## **5. pH Buffers and Isotonic Solutions**

**5.1 - 5.42**

|       |                                |      |
|-------|--------------------------------|------|
| 5.1   | Introduction                   | 5.1  |
| 5.2   | Sorensen's pH Scale            | 5.2  |
| 5.3   | Electrometric pH Determination | 5.6  |
| 5.3.1 | Colorimetric pH Determination  | 5.8  |
| 5.4   | Applications of Buffers        | 5.9  |
| 5.5   | Buffer Equation                | 5.10 |
| 5.6   | Buffer Capacity                | 5.13 |
| 5.7   | Buffers in Pharmaceuticals     | 5.18 |
| 5.8   | Buffers in Biological Systems  | 5.26 |
| 5.9   | Buffered Isotonic Solutions    | 5.28 |
| •     | Exercise                       | 5.41 |
