ROLE OF BIOCHEMISTRY IN A CLINICAL CHEMISTRY

LABORATORY

ADD ON CERTIFICATE PROGRAM

FROM

16th TO 29th JUNE-2022

ABOUT COLLEGE

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

VISION: To transform as reputed institution imparting Pharmacy education and Research in bringing out adept Professionals.

MISSION:

- Impart value based and value added pharmacy education to meet global standards.
- Groom the students towards achieving academic excellence and encourage Research towards social orientations with emphasis on health care.
- Nurture the budding Pharmacists in catering to the needs of Industry and Society.
- Strengthen interaction of the institute with Industry and Hospitals.

PROGRAM OBJECTIVE

- Importance of laboratory test in clinical medicine.
- Causes of abnormal values of analytes measured in the laboratory.
- To check for damage from liver infections, such as hepatitis B and hepatitis C, especially if it's suspected you were exposed to a virus that causes hepatitis
- To monitor the side effects of certain medications because some medications are known to affect the liver.
- To monitor the disease and how well a particular treatment is working.

PROGRAM OUTCOMES

- On completion of the program, it is expected that the students will be able to Know major metabolic functions of the liver and causes of liver dysfunction.
- Knowing the physiology of kidneys and renal dysfunction.
- Knowing the markers of LFT and Kidney function tests.
- Identify the biochemical kidney and liver function tests with special emphasis on when to ask for the test, the indications and limitations of each kidney tests.
- Interpret the kidney and liver function tests properly.

Viswanadha Institute of Pharmaceutical Sciences

Venue: Room No: 205, VNIPS

Number of Students Enrolled: 23

Viswanadha Institute of Pharmaceutical Sciences organized a two week certificate program on “**ROLE OF BIOCHEMISTRY IN A CLINICAL CHEMISTRY LABORATORY**” for **I. Pharm. D students by the resource person – Ms.P.Sivalaitha**. She explained about the physiology of the organ systems and the importance of the biochemical tests in the clinical medicine for the appropriate goals of individualized therapy. A total of 23 students participated in this program and gained knowledge about topic. They were able to understand the following objectives and learning outcomes.

OBJECTIVES:

- Importance of laboratory test in clinical medicine.
- Causes of abnormal values of analytes measured in the laboratory.

- To check for damage from liver infections, such as hepatitis B and hepatitis C, especially if it's suspected you were exposed to a virus that causes hepatitis
- To monitor the side effects of certain medications because some medications are known to affect the liver.
- To monitor the disease and how well a particular treatment is working.

LEARNING OUTCOMES:

On completion of the program, it is expected that the students will be able to

- Know major metabolic functions of the liver and causes of liver dysfunction.
- Knowing the physiology of kidneys and renal dysfunction.
- Knowing the markers of LFT and Kidney function tests.
- Identify the biochemical kidney and liver function tests with special emphasis on when to ask for the test, the indications and limitations of each kidney tests.
- Interpret the kidney and liver function tests properly.

This course is useful to students to acquire knowledge on oils and proteins. Received positive feedback from the students. Our management and principal Dr. P. Uma Devi conveyed thanks to resource person and wishes to students. The program was conducted successfully.

ABOUT US

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. It is being run by Viswanadha Educational Society (VES). VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

CONCEPTS OF BIOSTATISTICS AND DESIGN OF EXPERIMENT

ADD ON CERTIFICATE PROGRAM

From

02th TO 17th Aug-2022

VISWANADHA INSTITUTE OF PHARMACEUTICAL SCIENCES

Affiliated to J.N.T.U.K-Kakinada, Approved by PCI & A.I.C.T.E, New Delhi

Program Objective

- To understand and apply statistical methods for the design of biomedical research and analysis of biomedical research data.
- To understand and use the concepts of Mathematical and Statistical underlying the application of biostatistical methods; use and interpret results from specialized computer software for the management and statistical analysis of research data
- To identify relationship between cause and effect
- To understand the interaction effect among the factors and to minimize the errors
- The course objective is to learn how to plan, design and conduct experiments efficiently and effectively, and analyze the resulting data to obtain objective conclusions.

Program Outcomes

- To define the principle concepts about biostatistics in relation with the other sciences.
- To collect data relating to variable/variables which will be examined and calculate descriptive statistics from these data.
- To identify data relating to variable/variables.
- How to design and conduct experiments and how to analyze them properly to answer various research questions, design and statistical analysis issues are discussed
- To understand the process of designing an experiment including factorial and fractional factorial designs.
- To examine how a factorial design allows cost reduction, increases efficiency of experimentation, and reveals the essential nature of a process.

PROGRAM REPORT

Name of the Program : A Two Week Certificate program “CONCEPTS OF BIOSTATISTICS AND DESIGN OF EXPERIMENT”

Date 2/8/22 to 17/8/22.

Resource person : Dr B Nagamani

Associate Professor , Dept Of Pharmaceutical Analysis

Viswanadha Institute Of Pharmaceutical Sciences

Contact number : 9985407591

Email.ID: bnmtata@gmail.com

Name of the Co-ordinator : Dr Pratyusha Behra

Asst Professor

Viswanadha Institute Of Pharmaceutical Sciences

Number of Students Enrolled : 19

Venue: VNIPS Seminar Hall.

Viswanadha Institute Of Pharmaceutical Sciences organised A Two Week Certificate program on “CONCEPTS OF BIOSTATISTICS AND DESIGN OF EXPERIMENT” for IV Pharm.D students by the Resource person : Dr B.Nagamani. She explained about concepts of Biostatistics and Design of experiment. A total of 19 students were participated in this program and gained knowledge about topic. They were able to understand the following Objectives and Learning outcomes .

Objectives :

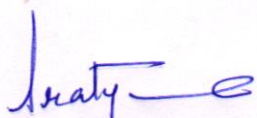

- To understand and apply statistical methods for the design of biomedical research and analysis of biomedical research data.

- To understand and use the concepts of Mathematical and Statistical underlying the application of biostatistical methods; use and interpret results from specialized computer software for the management and statistical analysis of research data
- To identify relationship between cause and effect
- To understand the interaction effect among the factors and to minimize the errors
- The course objective is to learn how to plan, design and conduct experiments efficiently and effectively, and analyze the resulting data to obtain objective conclusions.

Learning Outcomes:

- To define the principle concepts about biostatistics in relation with the other sciences.
- To collect data relating to variable/variables which will be examined and calculate descriptive statistics from these data.
- To identify data relating to variable/variables.
- How to design and conduct experiments and how to analyze them properly to answer various research questions, design and statistical analysis issues are discussed
- To understand the process of designing an experiment including factorial and fractional factorial designs.
- To examine how a factorial design allows cost reduction, increases efficiency of experimentation, and reveals the essential nature of a process.

This course is useful to students to acquire knowledge about data handling and to design an experiment with various variables and levels. Received positive feedback from the students. Our Management and Principal Dr. P.Umadevi conveyed thanks to resource person and wishes to Students. The program was conducted successfully.

Program Objectives :

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

COURSES OFFERED:

- B.PHARMACY (4 YEARS)
- Pharm. D
- M.PHARMACY
 - PHARMACEUTICS
 - PHARMACEUTICAL ANALYSIS

- The primary objective of Six Sigma is customer satisfaction, and to achieve the objective, various methods are followed to improve the performance of a product or business process.
- Six Sigma is a set of methodologies and tools used to improve business processes by reducing defects and errors, minimizing variation, and increasing quality and efficiency.
- The goal of Six Sigma is to achieve a level of quality that is nearly perfect, with only 3.4 defects per million opportunities.

Outcomes of The program

- Six Sigma originated in the 1980s and seeks to improve output quality by reducing defects Six Sigma is used to identify and reduce errors and increase the efficiency of business processes.
- Lean Six Sigma seeks to improve employee and company performance by eliminating the waste of resources and process/product defects.
- It combines the process improvement methods of Six Sigma and lean enterprise.
- Lean Six Sigma helps to establish a clear path to achieving improvement objectives.

PROGRAM REPORT

Name of the Program : A Two Week Certificate program on “ **Six Sigma-A Novel Approach to Pharmaceutical Industry**”

Date: 10/10/22 to 24/10/22

Resource person : Ms. M Bhagya Sree

Associate Professor

Viswanadha Institute Of Pharmaceutical Sciences

Contact number : 7013884208

Email.ID: bhagya.joga @gmail.com

Name of the Co-ordinator : Dr B Nagamani

Associate Professor , Dept Of Pharmaceutics

Viswanadha Institute Of Pharmaceutical Sciences

Number of Students Enrolled : 28

Venue: VNIPS Seminar Hall.

Viswanadha Institute Of Pharmaceutical Sciences organised A Two Week Certificate program on “ **Six Sigma-A Novel Approach to Pharmaceutical Industry**” for **IV.I.Bpharm students by the Resource person** : Ms.M.Bhagya Sree. She explained about variuos aspects of “ Six Sigma-A Novel Approach to Pharmaceutical Industry”. A total of 28 students were participated in this program and gained knowledge about the topic. They were able to understand the following Objectives and Learning outcomes .

Objectives :

1. The primary objective of Six Sigma is customer satisfaction, and to achieve the objective, various methods are followed to improve the performance of a product or business process.
2. Six Sigma is a set of methodologies and tools used to improve business processes by reducing defects and errors, minimizing variation, and increasing quality and efficiency.
- 3.
4. The goal of Six Sigma is to achieve a level of quality that is nearly perfect, with only 3.4 defects per million opportunities.

Learning Outcomes:

- Six Sigma originated in the 1980s and seeks to improve output quality by reducing defects Six Sigma is used to identify and reduce errors and increase the efficiency of business processes.
- Lean Six Sigma seeks to improve employee and company performance by eliminating the waste of resources and process/product defects.
- It combines the process improvement methods of Six Sigma and lean enterprise.
- Lean Six Sigma helps to establish a clear path to achieving improvement objectives.
- The Lean strategy was established by Toyota in the 1940s and attempts to streamline operational processes, from manufacturing to transactions.
-

This course is useful to Students to acquire knowledge in Maintenance and Improvement of quality in Pharmaceutical Industry. Received positive feedback from the students. Our Management and Principal Dr. P .Umadevi conveyed thanks to resource person and wishes to Students. The program was conducted successfully.

ABOUT US

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. It is being run by Viswanadha Educational Society (VES). VNIPS is affiliated to JNTU (Jawaharlal Nehru Technological University) Kakinada and approved by AICTE (All India Council for Technical Education) & PCI (Pharmacy Council of India) New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS

OBJECTIVE

- To provide basic fundamentals and various unit operations such as size reduction, separation, filtration, centrifugation, evaporation etc.
- To give complete information about the importance of unit operations and their equipment.

OUTCOMES OF THE PROGRAMME:

- Upon completion of the program the students must be able to know the various unit operations used in pharmaceutical industries.
- Understand the material handling techniques.
- Perform various processes involved in pharmaceutical manufacturing process.
- Get awareness about the preventive methods used for corrosion control in pharmaceutical industries.

COURSES OFFERED:
B.PHARMACY , PHARM. D
M.PHARMACY
PHARMACEUTICS
PHARMACEUTICAL ANALYSIS
& QUALITY ASSURANCE.

ABOUT COLLEGE

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

VISION: To transform as reputed institution imparting Pharmacy education and Research in bringing out adept Professionals.

MISSION:

Impart value based and value added pharmacy education to meet global standards.

Groom the students towards achieving academic excellence and encourage Research towards social orientations with emphasis on health care.

Nurture the budding pharmacists in catering to the needs of Industry and Society.

Strengthen interaction of the institute with Industry and Hospitals.

PROGRAM OBJECTIVE

- To know and understand the daily activities to be performed by the clinical pharmacist.
- To obtain a sound knowledge on the ward round participation & drug therapy monitoring.
- To provide the patient care by reporting any adverse events occurring and taking the precautions to be not happen anymore and also to object the drug information and poisons information handling.
- To obtain a skill in the drug utilization evaluation and drug utilization reviewing to provide an appropriate treatment-based plan & the medical abbreviations and terminology used in clinical practice should be known.

PROGRAM OUTCOMES

- Making a practice of daily activities of a clinical pharmacist.
- Participation in the ward rounds & monitor the drug therapy relating to any adverse events occurring.
- Review & evaluate the drug utilization by understanding and maintaining the medical chart & reviewing the chart time to time.
- Gathering information from the patient or their attendees for the appropriate therapy or an individualized based therapy.
- Handling the information about drugs and poisons,
- Counseling the patient with regarding to quality of life, maintaining the quality assurance of the services provided by the clinical pharmacist.
- Patient case history collection by collecting in a structured form which is useful in evaluating the drug therapy.

PROGRAM REPORT

Name of the Program: A two week Certificate Program “PATIENT DATA ANALYSIS AND ACTIVITIES OF CLINICAL PHARMACIST”

Date: 05/12/2022 to 17/12/2022

Resource Person: Dr. M. Savithri

Professor

Viswanadha Institute of Pharmaceutical sciences

Contact number: 9885560877

Mail ID: savi_mode@yahoo.co.in

Name of the Co-Ordinator: Mrs. B. Prathyusha

Assistant professor

Viswanadha Institute of Pharmaceutical Sciences

Venue: Pharm. D practice area, VNIPS

Number of Students Enrolled: 37

Viswanadha Institute of Pharmaceutical Sciences organized a two week certificate program on “PATIENT DATA ANALYSIS AND ACTIVITIES OF CLINICAL PHARMACIST” for III & IV Pharm. D students by the resource person –Dr. M. Savithri. She explained about various concepts and activities of a clinical pharmacist and patient data analysis for availing the patients quality of life. A total of 37 students participated in this program and gained knowledge about topic. They were able to understand the following objectives and learning outcomes.

OBJECTIVES:

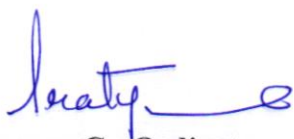

- To know and understand the daily activities to be performed by the clinical pharmacist.
- To obtain a sound knowledge on the ward round participation & drug therapy monitoring.
- To provide the patient care by reporting any adverse events occurring and taking the precautions to be not happen anymore and also to object the drug information and poisons information handling.
- To obtain a skill in the drug utilization evaluation and drug utilization reviewing to provide an appropriate treatment-based plan & the medical abbreviations and terminology used in clinical practice should be known.
- To be a good clinical pharmacist one must know collecting the case from the patient i.e, medication history collection & also counsel the patient with appropriate care about his condition & what step to be taken further, ultimately providing the patient knowing about the therapy.
- Quality assurance should be done to the services provided by the clinical pharmacist to assure that the care given to the patient is maintained qualitative & the patient's response indicates this assurance towards the patient's quality of life.

LEARNING OUTCOMES:

On completion of the program, it is expected that the students will be able to understand

- Making a practice of daily activities of a clinical pharmacist.
- Participation in the ward rounds & monitor the drug therapy relating to any adverse events occurring.
- Review & evaluate the drug utilization by understanding and maintaining the medical chart & reviewing the chart time to time.
- Gathering information from the patient or their attenders for the appropriate therapy or an individualized based therapy.
- Handling the information about drugs and poisons,
- Counselling the patient with regarding to quality of life, maintaining the quality assurance of the services provided by the clinical pharmacist.
- Patient case history collection by collecting in a structured form which is useful in evaluating the drug therapy.
- The prescription which consists of the medical abbreviations and terminology properly & provide the quality of the drug therapy accordingly.

This course is useful to students to acquire knowledge on patient data analysis and activities of clinical pharmacist. Received positive feedback from the students. Our management and principal Dr. P. Uma Devi conveyed thanks to resource person and wishes to students. The program was conducted successfully.

Week/Day Wise Schedule

S.No	Date	Topics to be covered
1	6/2/23	Dosage process development
2	7/2/23	Importance of Excipients
3	8/2/23	Drug Excipient Interactions
4	9/2/23	What are important considerations for qualifying excipients
5	10/2/23	what is important for the development of novel excipients
6	13/2/23	Strategy to approach a novel excipient project
7	14/2/23	Hurdles and challenges in the development of novel excipients
8	15/2/23	FDA Guidelines and requirements for Novel excipients
9	16/2/23	EMA Guidelines on Excipient Risk Assessment
10	17/2/23	Pharmaceutical Excipients and risk assessment guidance
11	19/2/23	Qualification of Excipients for Use in Pharmaceuticals
12	20/2/23	Novel Excipients examples – Novel drug delivery systems

ABOUT INSTITUTION

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

VISION: To transform as reputed institution imparting Pharmacy education and Research in bringing out adept Professionals.

MISSION:

- Impart value based and value added
- pharmacy education to meet global standards.
- Groom the students towards achieving
- academic excellence and encourage Research towards social orientations with emphasis on health care.
- Nurture the budding Pharmacists in
- catering to the needs of Industry and Society.
- Strengthen interaction of the institute with
- Industry and Hospitals.

OBJECTIVE

- These are the additives that are added to the formulation along with pharmacologically active substance. The main purpose of adding them is to increase the bulk of the formulation along with imparting desired properties.
- Excipient properties affect batch and continuous powder blending processes.
- Drug–excipient compatibility studies are essential because of the following rationales: It assists in maximizing the stability of a dosage form, as any physical or chemical interaction between drug and excipient can affect the bioavailability, stability, and safety of a drug.

OUTCOMES

- The rapid development and manufacturing of new drugs and therapeutics being pushed through the pipeline, excipient manufacturers are navigating a challenging landscape to meet the demand for new and novel excipients. Lean Six Sigma seeks to improve employee and company performance by eliminating the waste of resources and process/product defects.
- Different regulatory authorities should provide their own guidance on safety testing for novel excipients.
- The Center for Drug Evaluation and Research, a part of the US FDA, announced in September 2021 the launch of a voluntary Novel Excipient Review Pilot Program.

PROGRAM REPORT

Name of the Program : A Two Week Certificate program on “Novel excipients – Regulatory challenges and Perspectives”

Date: 6/2/23 to 20/2/23.

Resource person : Dr B Nagamani

Professor

Viswanadha Institute Of Pharmaceutical Sciences

Contact number : 9985407591

Email.ID: bnmtata@gmail.com

Name of the Co-ordinator : Ms A Suneeta Devi

Associate Professor , Dept Of Pharmaceutics

Viswanadha Institute Of Pharmaceutical Sciences

Number of Students Enrolled : 39

Venue: VNIPS Seminar Hall.

Viswanadha Institute Of Pharmaceutical Sciences organised A Two Week Certificate program on “**Novel excipients – Regulatory challenges and Perspectives**” for IV.II Bpharm students by the **Resource person : Dr B Nagamani**. She explained about various aspects of “**Novel excipients – Regulatory challenges and Perspectives**”.

A total of 39 students were participated in this program and gained knowledge about the topic. They were able to understand the following Objectives and Learning outcomes.

Objectives :

1. These are the additives that are added to the formulation along with pharmacologically active substance. The main purpose of adding them is to increase the bulk of the formulation along with imparting desired properties.

2. Excipient properties affect batch and continuous powder blending processes.
3. Drug–excipient compatibility studies are essential because of the following rationales: It assists in maximizing the stability of a dosage form, as any physical or chemical interaction between drug and excipient can affect the bioavailability, stability, and safety of a drug.

Learning Outcomes:

- The rapid development and manufacturing of new drugs and therapeutics being pushed through the pipeline, excipient manufacturers are navigating a challenging landscape to meet the demand for new and novel excipients. Lean Six Sigma seeks to improve employee and company performance by eliminating the waste of resources and process/product defects.
- Different regulatory authorities should provide their own guidance on safety testing for novel excipients.
- The Center for Drug Evaluation and Research, a part of the US FDA, announced in September 2021 the launch of a voluntary Novel Excipient Review Pilot Program.

This course is useful to Students to acquire knowledge in Excipients' role in designing different dosage forms in Pharmaceutical Industry. Received positive feedback from the students. Our Management and Principal Dr. P .Umadevi conveyed thanks to resource person and wishes to Students. The program was conducted successfully.

Name of the Co-ordinator: Mrs.D. Aswini,

Assistant Professor,

Dept of Pharmaceutics.

Venue: Seminar hall, Viswanadha Institute of Pharmaceutical sciences.

Viswanadha institute of Pharmaceutical Sciences, Sontyam, organized A Two Week certificate program on Importance of healthy food intake for humans for I-I B. Pharm students by the resource person Dr. M. Savithri, involves, how the healthy diet essential for good health and nutrition, how it helps in maintain a balanced diet . A Total of 39 students participated in this training program and after the completion of the program they were able to understand the objectives of the program.

Objectives:

1. A healthy diet is essential for good health and nutrition.
2. It gives protection against many chronic non-communicable diseases.
3. Helps in people maintain a healthy weight.
4. Maintain a cheerful, hopeful outlook on life.

Learning Outcomes:

Upon Completion of the Program, Students are able to learn:

1. How the healthy diet may help you live longer.
2. How the healthy diet lowers the risk of heart diseases.
3. A well balanced diet provides all of the energy you need to keep active throughout the day

This Course was very useful to the students and their feedback is positive. The management and Dr. P. Umadevi, Principal of Viswanadha Institute of Pharmaceutical sciences, thanked the resource person and participants for making the programme successful.

ABOUT INSTITUTION

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

VISION: To transform as reputed institution imparting Pharmacy education and Research in bringing out adept Professionals.

MISSION:

- Impart value based and value added
- pharmacy education to meet global standards.
- Groom the students towards achieving
- academic excellence and encourage Research towards social orientations with emphasis on health care.
- Nurture the budding Pharmacists in
- catering to the needs of Industry and Society.
- Strengthen interaction of the institute with
- Industry and Hospitals.

ABOUT PROGRAM

Title:

INTRODUCTION TO COMMUNICATION SKILLS

OBJECTIVE

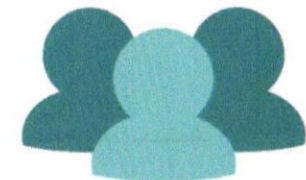

- Understand the behavioral needs for a Pharmacist to function effectively in the areas of pharmaceutical operation
- Communicate effectively (Verbal and Non Verbal)
- Effectively manage the team as a team player
- Develop interview skills
- Develop Leadership qualities and essentials

Resource Person

OUTCOMES

Upon Completion of the Program, Students are able to learn:

- Define communication
- Explain why effective communication is an important management skill
- Explain the impact that body language has on intercultural communication
- To evaluate our non-verbal communication skills

PROGRAM REPORT

Name of the Event: A Two Week Certificate Program on “**Introduction to communication skills**”.

Date: 03-04-2023 to 19-04-2023

Resource Person: Mrs.A.Anuradha
Professor
Contact No: 9676729884
Email ID: a.anura@gmail.com

Name of the Co-ordinator:Ms.A. Lalithadevi,
Assistant Professor,
Dept of Pharmaceutical Chemistry.

Venue: Seminar hall, Viswanadha Institute of Pharmaceutical sciences.

Viswanadha institute of Pharmaceutical Sciences, Sontyam, organized A Two Week certificate program on Introduction to Communication skills for I-I B. Pharm students by the resource person **Prof. A. Anuradha**, involves, understand the behavioral needs for a pharmacist to function effectively in the areas of pharmaceutical operation . A Total of 37 students participated in this training program and after the completion of the program they were able to understand the objectives of the program.

Objectives:

1. Understand the behavioral needs for a Pharmacist to function effectively in the areas of pharmaceutical operation
2. Communicate effectively (Verbal and Non Verbal)
3. Effectively manage the team as a team player
4. Develop interview skills
5. Develop Leadership qualities and essentials

Learning Outcomes:

Upon Completion of the Program, Students are able to learn:

1. Define communication
2. Explain why effective communication is an important management skill
3. Explain the impact that body language has on intercultural communication
4. To evaluate our non-verbal communication skills.

This Course was very useful to the students and their feedback is positive. The management and Dr. P. Umadevi, Principal of Viswanadha Institute of Pharmaceutical sciences, thanked the resource person and participants for making the programme successful.

DRUGS ACTING ON CENTRAL NERVOUS SYSTEM

ADD ON CERTIFICATE PROGRAM

STARTS FROM

10th TO 25th APRIL -2023

**VISWANADHA INSTITUTE OF
PHARMACEUTICAL SCIENCES**

Affiliated to J.N.T.U.K-Kakinada,

Approved by PCI & A.I.C.T.E, New Delhi

ABOUT COLLEGE

Viswanadha Institute of Pharmaceutical Sciences (VNIPS) was established in 2008. VNIPS is affiliated to Jawaharlal Nehru Technological University, Kakinada and approved by All India Council for Technical Education & Pharmacy Council of India, New Delhi.

VNIPS has all state of art facilities required for running the courses in a best way. It has a team of well experienced, vibrant and dynamic faculty under the veteran leadership of Principal Dr. P. Uma Devi. Quality Education is the prime motto of VNIPS.

VISION: To transform as reputed institution imparting Pharmacy education and Research in bringing out adept Professionals.

MISSION:

Impart value based and value added pharmacy education to meet global standards.

Groom the students towards achieving academic excellence and encourage Research towards social orientations with emphasis on health care.

Nurture the budding Pharmacists in catering to the needs of Industry and Society.

Strengthen interaction of the institute with Industry and Hospitals.

PROGRAM OBJECTIVE

To explain about different categories of drugs that act on CNS like anesthetics, Sedatives, anti-epileptics, anti-depressants and anti-Psychotics.

To render awareness about the drug therapies used for management of neurological and Psychiatric disorders.

To provide complete information of the drugs ,their usage and side effects which act on the CNS.

PROGRAM OUTCOMES

Upon completion of the program the students must be able to illustrate the approaches in the management of Parkinsonism.

They should be able to explain the side of action, uses, and adverse effects of the drugs that act on CNS.

The students should be able to describe the adverse effects of sedatives, hypnotics and opioid analgesics.
